Projects

Development of the Platform for Safety from Disasters *Ministry of Science and ICT*
Researcher Dec. 2019 - Aug. 2022
- I developed the algorithm for removing anomalies and imputing missing values of sensor data in real time. The method is based on the online tensor decomposition algorithm.

Robust, Fair, and Scalable Data-driven Continual Learning *Ministry of Science and ICT*
Researcher Sep. 2022 -
- I am developing a novel continual learning algorithm for graph neural networks.
